# Lesson 6: Can Drosie Climb?

Thinking and working like a scientist | Storybook pages 28–37

Name: _____ Date: _____

## LET'S EXPLORE

Graph sample counts from three climbing trials and describe the evidence.

1. My prediction is…

_____

_____

2. Sample data: 6, 7, 5 flies reached the line in trials 1, 2, 3. Which trial had the most?

_____

_____

## DRAW, DIAGRAM, OR GRAPH YOUR IDEA

FACILITATOR MINI-GUIDE

# Lesson 6: Can Drosie Climb?

Storybook pages 28–37 | Grades K–3; adaptable to 4–5

## Learning goal

Make predictions, observe an adult-led climbing assay or video, record trials, and interpret a graph.

## Before reading

Invite children to share what they already know. Record questions without immediately correcting every guess.

## During reading

Pause for careful observations, ask what the illustrations show, and distinguish what is visible from what is inferred.

## After reading

Graph sample counts from three climbing trials and describe the evidence.

## Adaptation

K–1: use drawing and oral responses. Grades 2–3: add labels and a sentence of evidence. Grades 4–5: discuss uncertainty, fair comparisons, or limitations.

## Safety and accuracy

Any live-fly demonstrations must be adult-led with secured containers; prerecorded observations are an accessible alternative.
